## **Quote Box Plugin**

The Quote Box Plugin shows a preview quote and an author credit in an SVG outline shape. When the user clicks on the shape, a larger version appears as a modal component, floating over the page. The larger version contains the full quote and the full author credit.

modal quote box

The plugin's settings are mostly obvious, the fields **full quote**, **preview quote**, **full credit** and **preview credit** are used to set the text content in the respective views. Using the **background** dropdown selector the user can select one of five outlines for the background.

w / Column / Que	ote Box				
eview paddings					
IEW CONTEXT	TOP (PX)	LEFT (PX)	RIGHT (PX)	BOTTOM (PX)	DELETE?
PreviewPadding obje	ect (1)				
Desktop 💌	32	68	34	0	
	ew padding				
ddings					
uddings /IEW CONTEXT	TOP (PX)	LEFT (PX)	RIGHT (PX)	BOTTOM (PX)	DELETE?
uddings		LEFT (PX)	RIGHT (PX)	BOTTOM (PX)	
uddings /IEW CONTEXT		LEFT (PX)	RIGHT (PX)	BOTTOM (PX)	DELETE?
ddings /IEW CONTEXT Padding object (1) All	TOP (PX)				
ddings /IEW CONTEXT Padding object (1)	TOP (PX)				

Depending on the length and the wording of the texts, the space between the text and the outline might have to be adjusted, this is the padding. There are paddings for the preview element and for the larger modal element. If necessary the user can also specify settings for mobile screen sizes and for desktop.
